

Bendix® Advanced 20K Linings

BA200
Affordable standard
grade friction with
excellent wear

GAWR
20,000 lbs.

**FMVSS 121
Conditions:**
Axle Rating:
20,000 lbs.

Brake Size:
16.5 x 7

Rolling Radius:
20.8"

AL Factor:
165

If you're looking for an attractively priced 20,000 lb. material with mid-range stopping power, long service life and lower cost per mile, Bendix® Advanced BA200 is an excellent choice.

Bendix® Advanced is available in a wide range of applications to cover all your brake shoe requirements, and is an ideal product for maintaining your Bendix® ES™ (Extended Service) brakes.

Friction Properties

Wear

Excellent friction and drum wear across a wide range of applications

Temperature

Minimal fade at mid- to high-temperatures

Vocation

This standard grade friction is designed to meet the requirements of line-haul and general freight (average weight) applications. Well suited for above average to steep/rough terrain

Performance/Stopping Power

Delivers stable mid-range stopping power

Safety

Certified at 20K GAWR utilizing an AL 165 factor (T30 chamber and 5.5" slack adjuster). All Bendix® linings are FMVSS 121 compliant for applications not requiring RSD.

Environmental

All linings comply with 2025 Zero Copper requirement designated (Level "N")

ATTENTION:

This Bendix friction is not a direct replacement for OEM friction designed to meet the Federal Mandate for Reduced Stopping Distance (RSD) on vehicles manufactured beginning 2011. This friction is FMVSS-121 compliant prior to the RSD mandate taking effect.

WARNING: Bendix strongly recommends the use of RSD certified friction on all vehicles originally manufactured with RSD brake friction. Failure to utilize RSD friction could negatively impact the safe operation of the vehicle.

BA200 is part of the Bendix® Advanced Category of Friction. Learn More:

Performance Characteristics

Bendix® Advanced BA200

Friction tested and certified by the brake experts at Bendix.

Much more than a friction manufacturer or brake shoe reliner, we are a full brake system supplier with unparalleled expertise to support your fleet. We're uniquely qualified to develop brake products to exacting standards. That's why we maintain standard position at Kenworth®, Peterbilt®, Volvo® and Mack® and are an option at International® and Daimler Trucks North America.

We go beyond industry standard friction tests to conduct our own proprietary procedures on four in-house dynamometers. With the full range of Bendix® linings – from OE linings and high performance solutions to meet RSD requirements, to premium aftermarket and economy grade friction – you can be confident you're getting more. More performance. More service life. More value.
